Chief Principal's
Teachers Training Colleges,

WELCOME TO KAGUMO TEACHERS' TRAINING COLLEGE TECHNOLOGICAL INNOVATIONS

Business Processing Re-Engineering, a subcommitee of the performance contract(PC), is pleased to share with you the various technological innovations used in the institution to enhance ease of doing business. To start with, we have automated various departments using (ERP) which has greatly enhanced operations in Finance,Procurement,Registry and Human Resource departments.The college library is automated using (KOHA) software and as a result, location of textbooks is much easier and so is keeping track of borrowings and lendings. For ease of communication within the institution and with our stakeholders, members have been assigned customized email addresses which appear in the following format:charles@kagumocollege.ac.ke.We invite you to come and benchmark with us as we look forward to learning from your institutions

Report Compiled By

Gladys Muriithi
CHAIRPERSON
**SERVICE DELIVERY AND INNOVATIONS SUBCOMMITTEE**

BIOMETRIC TECHNOLOGY

Human Resource Department use this technology to curb wastage of resources which could arise when members of staff report late to work or check out earlier than the stipulated time

DIGITAL NOTICEBOARD

This is a tool for information management which enables us to, display, manipulate and update any information pertaining to the institution. You only need a smart TV and a server. The same technology is used in banks to advertise their products and display it on their lobby
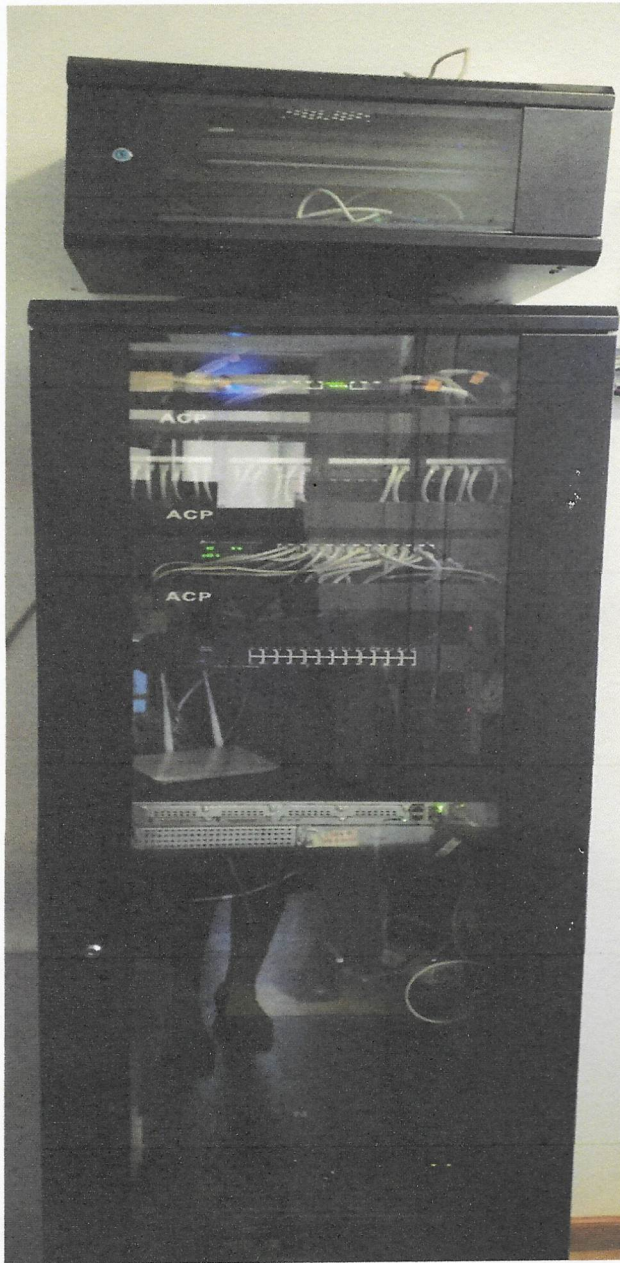

MAGNETIC NOTICEBOARDS

We use these boards in place of the traditional noticeboards. They use magnets which are recyclable instead of pins and this makes them durable and whatever you display doesn't get mutilated

Color printer

INTERNET CONNECTIVITY

To enhanced communication, research, security and entertainment

CCTV CAMERAS

We use this technology to monitor class attendance and for physical security of resources.

Task Alfa 800 i

This is a robust heavy duty photocopier which has the stapling capability and can print 72 rims in continuum. Very suitable for handling exams in large institutions

PROJECTORS

Projectors have been installed in all classes and laboratories to enhance ICT integration

Mission: To provide quality teacher education and training that produces patriotic, competent, innovative and self-directing professionals.

ISO 9001:2015 Certified
